

FLINDERS & UPPER NORTH LOCAL HEALTH NETWORK

2020 Transition to Professional Practice Program (TPPP) for Registered Nurses

About the Flinders & Upper North Health Services

The Flinders & Upper North Local Health Network (FUNLHN) consists of six hospitals throughout the Flinders Ranges, Far North of the State and the Eyre Peninsula. Country Health Connect outreach services are available across the region. It has a resident population of approximately 44,000. Health services are located within the communities of Port Augusta, Whyalla, Quorn, Hawker, Leigh Creek, Roxby Downs, Woomera, Marree and surrounds.

The health services of Flinders & Upper North vary in size and function and offer a broad and challenging range of surgical, medical, maternity, aged care, theatre, accident and emergency and outpatient services.

What does the TPPP for Registered Nurses look like in the Flinders & Upper North Local Health Network?

The FUNLHN Transition to Professional Practice Program (TPPP) provides new graduates with:

- Support and guidance in their first year of practice as a Registered Nurse (RN)
- Experience working in a country setting that assists participants to become resourceful, flexible and adaptable - a great start and solid foundation for your nursing career

The FUNLHN TPPP program aims to support the newly qualified Registered Nurses to consolidate and develop skills and knowledge reflected in high quality nursing practice. The transition program is evidence-based, developed by rural nurses and midwives and informed by the practical experience of our rural and regional workforce.

Differences in location, size/type of health unit will make each Registered Nurse experience in their first year unique. These opportunities enable development of the skills required for a 'rural generalist' RN. This may include surgical, medical, maternity, aged care, theatre, accident and emergency and outpatient services. A FUNLHN TPPP incorporates practice support, clinical time allocated to enhance learning supported by an online learning platform and a minimum of four professional development/study days.

Opportunities exist for clinical rotation to specialty areas within the larger health services. Some sites may offer opportunity to work across health units. Opportunity for full or part time positions within this program is available, and should be discussed with the relevant site prior to application.

There is a local health network approach to management of the program and education days are scheduled with TPPP participants from FUNLHN.

The health unit contact person will be able to answer questions about the TPPP at their site including information about:

- Start dates – most programs commence between January and March although there may be some programs which commence later
- Whether the position is full or part time
- What experiences that particular site can offer and whether clinical rotations are available

- Whether the program includes rotations to more than one health unit
- The TPPP with a speciality focus e.g. perioperative, aged care
- The local community, transport, accommodation and the local area

Combined Registered Nurse and Registered Midwife TPPP

If you are also a new Registered Midwife and interested in a combined Registered Nurse and Registered Midwife TPPP FUNLHN is pleased to offer this program. The combined program gives graduates new to both the nursing and midwifery professions support as they start their careers. A separate application for the combined RN/RM TPPP can be submitted via the Registered Midwife TPPP application portal which will be available mid July 2019.

For more information about the Combined RN/RM Program contact:

Carol Salmon

Nurse & Midwife Education Facilitator

The Flinders & Upper North Local Health Network will be offering TPPP RN positions in the following health services:

1. Whyalla Hospital & Health Services

The Whyalla health service has been designated to be one of the four regional hospitals within Country Health SA. The health service has accommodation for 72 acute inpatients, the first Regional Cancer Centre in SA including a medium level Chemotherapy Unit, an inpatient mental health unit with Community Mental Health services, a dedicated Rehabilitation unit and purpose built facilities and Theatre complex It also includes the Country Health Connect and Community Health Services that provide specialist nursing and allied health services and currently employs over 400 staff. Maternity services are provided in the Women's and Children's Unit, a combined 19 bed Obstetric, Gynaecological, Surgical and Paediatric unit. There are 3 birthing suites, and has an average of 170 deliveries per year. A Community Midwifery service, pre admission clinic and ante-natal clinic support an early post-natal discharge program. Participants may be offered ongoing employment following successful completion of the TPPP.

Contact: Amelia Sliedrecht, Clinical Facilitator

Tel: 08 86488510 or Email: amelia.sliedrecht@sa.gov.au

2. Port Augusta Hospital and Regional Health Service

The Port Augusta Hospital and Regional Health Service provides Acute Hospital Services provides care to patients across the spectrum from Neonates to Elderly. Medical Care is provided by Local GP's, Contracted Medical Officers and Specialist Consultants. Our Nurses work in close partnership with our Allied Health and Community Health Services.

Clinical areas include: Medical, General Surgical, Operating Theatre, Obstetrics and Gynaecology, Paediatrics, Emergency Department, Specialist Consulting Suite, Chemotherapy Unit, and a Renal Dialysis Unit.

Other services provided at the Port Augusta Hospital include Palliative Care, Community Mental Health,

Diabetes Education, Community Midwifery Services (Pre and Post Natal), Allied Health Services (Hospital and Community), Domiciliary Care, Women's Health Service, and a Community based Nursing Service.

Port Augusta is the Regional Base for the Royal Flying Doctor Service, which provides medical care for patients in isolated and remote communities. The hospital serves a large remote area of the state.
